ANY TYPE OF ENVELOPE - FROM C5/6 UP TO C4
MODULAR - IT CAN GROW WITH YOUR BUSINESS

INSERT'N FRANK

Automate your total mail flow by connecting the SI92 to a Neopost franking system.

WE VALUE YOUR MAIL

Neopost can provide you with over one hundred years of global expertise combined with a dedicated local support network of highly skilled product engineers to ensure you avail of the very highest levels of customer support at all times. When you choose to partner with Neopost, you choose a mailroom solution provider with over 100 years combined experience of the Irish mailroom market.

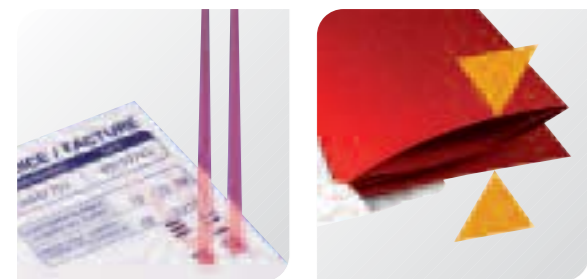

WHY CHOOSE NEOPOST?

Neopost is the European leader and a leading worldwide supplier of mailroom equipment and logistics solutions. Neopost offers you the most advanced range of products and services for on-line or off-line postage, large volume mail insertions, address printing, incoming mail and occasional parcel delivery and traceability management.

SPECIFICATIONS

STANDARD FEATURES	UNIQUE TO NEOPOST	DOCUMENTS	
flexFeed	Yes	Height	90 - 406 mm
Daily Mail for stapled and unstapled sets		Width	130 - 230 mm
Multiple sheet feeding		Weight	45 - 170 gsm
Electro-mechanical secure'n Feed	Yes	Feeder capacity	500 sheets (80 gsm)
Electro-mechanical secure'n Sert	Yes	VERSAFEEDER	
divert'n Continue	Yes	Height	90 - 340 mm
Tip-to-tip sealing	Yes	Width	120 - 230 mm
Cascade envelope feeding	Yes	Weight	80 - 250 gsm
Sorting options	Yes	Thickness	max. 5 mm
9 programmable jobs		SET THICKNESS	
Upgradability to more feeder stations		Maximum	5 mm
		ENVELOPES	
OPTIONAL FEATURES		Length	90 - 345 mm
Optical Mark Recognition (OMR)		Width	140 - 255 mm
Flex-OMR: recognition of non-Neopost OMR codes	Yes	Capacity hopper	800 envelopes
Reverse reading	Yes	FOLDING	
High capacity envelope conveyor belt (up to 2)	Yes	Capacity	Max. 8 sheets (80 gsm)
versaFeeder for up to 5 mm thick inserts (up to 2)	Yes	Max. weight	170 gsm
mix'n Go - Variable sizes of sets processed in 1 run	Yes	Fold types	letter, zigzag, single, double parallel, no fold
		PERFORMANCE	
		Speed	Up to 4,300/hour

DOUBLE SECURITY

To ensure that every recipient gets the correct mail piece, Neopost's electro-mechanical thickness detection protects against double feeding. It is insensitive to dust, and works with toner or coloured paper. The SI92 measures the thickness of every document from each feeder (secure'n Feed) and of the thickness of the set (secure'n Sert) right before inserting.

OPTICAL MARK RECOGNITION (OMR)

Optical Mark Recognition is a sequence of marks printed on your documentation to ensure the correct documentation reaches its intended recipients. The SI92 works with our OMR software to securely process outgoing mail. Flex OMR is also available with the SI92 to "read" non Neopost generated OMR for confident and secure processing of your mail.

INCREASE PROFITS WITH PRINTMACHINE SOLUTIONS

Increase the capabilities of your Folder Inserter and automate the entire document creation process with Neopost's PrintMachine software solutions. The PrintMachine software simplifies the creation and delivery of customer communication. It will shorten document creation cycles and increase profitability for your company. The PrintMachine software is a perfect complement to your SI92 folder inserter.

SI92
YOUR PRODUCTIVE,
VERSATILE MAILROOM
SOLUTION

The Folder Inserter designed for large mail runs and various envelope types.

WE VALUE YOUR MAIL

SI92

UNRIVALLED VERSATILITY AND PRODUCTIVITY

High productivity and exceptional versatility distinguishes the SI92 from its rivals. The SI92 provides high inserting speed, the capability to feed CDs/Booklets/bulky items, and C5/C6 up to C4 envelopes. The SI92 is modular, enabling the solution to grow and be added to, should your mailing requirements increase.

USER-FRIENDLY

The large central control panel has large clear pictograms and buttons. To make things even easier, the system has a 9-job memory so regular mail runs can be recalled at the press of a button.

MAXIMISED OUTPUT CAPACITY

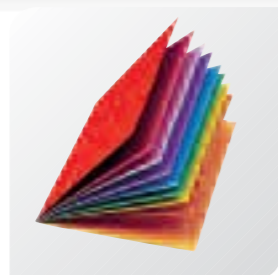

When one conveyor is full, the SI92 switches to the other, leaving you time to empty the first one.

EFFICIENT MAIL SORTING

SI92 automatically sorts mail into 2 exits based on envelope size, postal code, set thickness, OMR mark, or a combination of these.

MAXIMUM PRODUCTIVITY - CASCADING ENVELOPE FEEDERS

Twin feeders mean that the SI92 need never run out of envelopes. When one feeder runs empty, the other starts feeding, while you refill the first. Total capacity is over 800 envelopes.

EVERY KIND OF APPLICATION

Thanks to Neopost's unique flexFeed technology, you can load any document size in each of the feeders. The variety in applications is up to you. Furthermore, you don't need to fan documents before loading.

AUTOMATIC FOLD SETTING

The SI92's fully automatic folding capability allows you to fold up to 8 pages in tri-fold. Access to the SI92 is now easier than ever thanks to its clam shell design.

VERSAFEEDER

The optional Versafeeder allows you to process thicker items such as CD's, booklets and brochures - up to A4 size. Our Versafeeder can also be loaded from the top - to allow you to continue to load items whilst the machine is running. A second Versafeeder can be added for maximum productivity.

CONTINUOUS OPERATION

Document and envelope feeders can be refilled without stopping production, maximising practical speed and productivity.

MODULAR SOLUTIONS FOR ENHANCED FLEXIBILITY

The SI92 allows you to expand from 1 station up to 6 stations at any time, providing additional capacity should the demands on your machine increase with added mail volumes.

EXCELLENT ACCESSIBILITY

The SI92 gives you quick, safe and easy access to all parts of the paper path. You will quickly be up and running again if there is a break in production.

DAILY MAIL

The Daily Mail mode offers the possibility to process up to 8 sheets fed by hand, stapled or unstapled.

ELIMINATE PRE-SORTING - JUST MIX'N GO

Based on predefined criteria mix'n Go selects the right size of envelope for the right mailset. This means C5/6 and C4 envelopes can be processed in 1 run without pre-sorting.

DIVERT'N CONTINUE

To avoid stoppages and maximise efficiency the reading and collating module AS-1A diverts duplicate or faulty documents before folding them while the system is still running.
