SI62

YOUR OFFICE ASSISTANT

Remember the time when you had to put your mail together by hand? Manually collating, folding, inserting, sealing and stacking your mail pieces: a time-consuming business.

But there is a better way: the SI62 folder-inserter.

The SI62 handles all your mail automatically, saving you time and money. It produces a professional looking mail piece and it is as easy to use as a photocopier.

WIDE RANGE OF APPLICATIONS

Does your mail vary in paper size, paper quality etc.? Does it consist of invoices, cards or reply envelopes? The SI62 does it all for you.

The unique flexFeed feeders enable you to process any document size. Do you have inserts that are up to A5 size? Use the Short Feeder for optimised accessibility.

PROFESSIONAL LOOKING MAIL PIECE

Effective communication starts with a professional looking mail piece. That is why the SI62 collates and assembles all documents before folding them. The result: the recipient opens the envelope and all the documents are presented together, always in the right order.

POWERFOLD5

With powerFold5 you can fold up to 5 pages in tri-fold, crisply and silently.

EASY TO USE - AS SIMPLE AS A PHOTOCOPIER

LOAD'N GO - NO SPECIAL SKILLS REQUIRED

PROFESSIONAL LOOKING MAIL PIECE

LOW NOISE LEVEL - FOR ANY OFFICE ENVIRONMENT

FULLY ACCESSIBLE - ERGONOMIC DESIGN

LOAD'N GO

Everybody can use the SI62. No need for skilled operators thanks to load'n Go. Just load documents and envelopes 'n press the button to Go! The SI62 will adjust all settings automatically and even save them in the memory for instant recall. Regular jobs? Just run load'n Go and store the settings in one of the 9 available jobs.

FITS IN EVERY OFFICE ENVIRONMENT

Low noise level, great flexibility, compactness and matchless ease-of-use: these features make the SI62 fit in any office environment.

DAILY MAIL

The Daily Mail mode offers to process up to 5 sheets fed by hand, stapled or unstapled.

SECURE PROCESSING

To ensure that every recipient gets the correct mail piece, Neopost's electro-mechanical thickness detection protects against double feeding. It is insensitive to dust, and works with toner or coloured paper. The SI62 measures the thickness of every document from each feeder via secure'n Feed electro-mechanically.

OPTICAL MARK RECOGNITION (OMR)

Using a sequence of marks, the SI62 is able to securely process sets of documents with a varying number of pages to ensure they reach the correct recipient.

PRINTMACHINE SOFTWARE - ENRICH YOUR DOCUMENTS

Neopost's PrintMachine software helps you to add OMR-marks to your documents. A whole new world of mail creation possibilities will be unfolded.

WE VALUE YOUR MAIL

Neopost can provide you with over one hundred years of global expertise combined with a dedicated local support network of highly skilled product engineers to ensure you avail of the very highest levels of customer support at all times. When you choose to partner with Neopost, you choose a mailroom solutions provider with over 100 years combined experience of the Irish mailroom market.

INSERT'N FRANK

Automate your total mail flow by connecting the SI62 to a Neopost franking system.

ENVELOPE OUTPUT OPTIMISATION

Choose the best way to collect your filled envelopes and optimise space, ergonomics and productivity.
