Your desktop mail extractor

The fast, convenient and secure solution to open and extract your incoming mail

Incoming mail is very important in any business, however it can also be complex and time-consuming. Invoices, payments and correspondence arrive daily and can easily stack up.

Automation of this process results in a substantial saving of time so that your mail can be distributed earlier. It also reduces the likelihood of errors and increases performance.

With a Neopost letter-opening system by your side, you can make the process of mail opening simpler and much faster.

The IM-35 even extracts the content fully automatically.

- 1, 2 or 3 sided opening
- Exclusive slicing mechanism
- Fully automatic contents extraction
- Optional emptiness detection for extra security
- Optional conveyor belts for extra performance
- Save time and money

Fully automatic contents extraction on IM-35

sides, or can even extract the contents!

Easy to operate

The clear and simple control panel is self-explanatory and applications can be changed at the touch of a button. The user can concentrate on the core task: sorting and distributing the incoming mail as quickly and as accurately as possible.

Several operating modes

The IM-30 and IM-35 have several operating modes. The machine can be operated either at an adjustable continuous speed or at operator pace by using a unique sensor-driven envelope-transport methodology.

Simple and efficient opening and extraction

The IM-30 and IM-35 are built for efficiency and ease-of-use and are well within reach of private companies or corporate departments. Neopost offers you a solution with a small footprint that perfectly fits in an office environment. It opens hundreds of envelopes in just a few minutes, or even extracts the contents for more efficient routing.

Slicing mechanism

An exclusive and patented slicing mechanism slices the envelope open without cutting anything off. This protects against losing information from valuable documents and it eliminates the production of dust and scrap paper. It also guards against sharp paper edges.

Accessibility

The unique design of the IM-30 and IM-35 provides quick, easy and safe access to the entire envelope path, just by opening one cover.

Your mail is visible and accessible during the entire opening or extracting process.

Output optimisation

Optional conveyor belts enhance the productivity of the IM-30 and IM-35; more operators can sort and process the incoming mail.

Expand your possibilities

Extend the IM-30 and IM-35 with conveyor belts and professional mailroom furniture and create the ultimate mail processing solution for now and the future.

Customer and after sales service

Neopost ensures the best customer and after sales service in the world.

Electronic Document Management

Digitising incoming mail makes it quick and easy to distribute, process, store and retrieve documents.

Save time, save space and increase customer satisfaction.
